

9. The under bed hitch mounting system of claim **6**, wherein the first and second frame members comprise rectangular tubular members.

10. The under bed hitch mounting system of claim **6** further comprising a fifth wheel hitch attached with the first and second pair of receiving members.

11. An under bed hitch mounting system comprising:

a first rail;

a second rail spaced from the first rail, wherein the first and second rails are configured to attach to a frame of a vehicle;

a mid rail attached between the first and second rail;

a hitch ball socket positioned in the mid rail;

a first mounting section positioned on the mid rail; and

a first pair of receiving members positioned on the first mounting section.

12. The under bed hitch mounting system of claim **11**, wherein the mid rail is perpendicular with the first and second rails.

13. The under bed hitch mounting system of claim **11** further comprising a second mounting section positioned on the mid rail; and a second pair of receiving members positioned on the second mounting section.

14. The under bed hitch mounting system of claim **13**, wherein the first and second pair of receiving members are configured to have a fifth wheel hitch secured thereto.

15. The under bed hitch mounting system of claim **13** further comprising a fifth wheel hitch attached with the first and second pair of receiving members.
